EXPERIENCE

Front-End Developer Volunteer, March 2024 — Present
Empowered Futures - Calgary, AB
- Using NextJs and React, creating new features and managing the current portal for ongoing improvement
- Integrating GraphQL APIs within the application to efficiently fetch and manipulate data from the server
- Contributed to projects with an agile workflow, ensuring adaptability and efficiency in development processes

Junior Software Developer, Jan 2023 — Dec 2023
MintList Technologies Inc - Vancouver, BC
- Spearheaded development efforts for critical applications, utilizing TypeScript with Vue.js/Nuxt.js, React frameworks, and Golang to ensure seamless integration and smooth user experiences
- Led the enhancement of user profile and dashboard experiences for a digital auto marketplace, resulting in improved interface intuitiveness and increased user engagement
- Played a pivotal role in translating feature specifications into actionable development plans, advising on technical feasibility and proposing solutions
- Contributed to the design and development of user-friendly search interfaces, implementing algorithms to enhance search accuracy and efficiency

PROJECTS EXPERIENCE

[Something.AI](#)
- An app that allows users to communicate with fully animated AI characters in a manner similar to that of humans
- **Tech Stack**: React, Three.js, Express, NodeJS, PostgreSQL, Sequelize, ChatGPT-3 (OpenAI), Google Language Api

[Dog Hotel](#)
- UX/UI app development endeavor. An app that lets dog owners track their dog's daily activities with real-time chat, live cam, and daily reports is offered by a dog abroad service provider.
- [Case Study file](#)
